1. PULL OUT THE SAFETY SEAL.

2. AIM THE NOZZLE AT BASE OF THE

CEASEFIRE INSTALERT

Most buildings, offices, factories and commercial premises have been armed with fire extinguishers. Unfortunately, in the event of a fire, most of these extinguishers wouldn't be able to batter the flames. In some cases, the extinguishers have been vandalised or misused, making them useless. In others, the extinguishers have been stolen.

The answer isn't replacing or recharging these fire extinguishers. All you need is a device that can protect the extinguisher 24x7. So that in the case of an emergency, the extinguisher works perfectly to put out the flames and save lives.

Ceasefire's Instalert makes such a tamper-proof device.

HOW INSTALERT WORKS:

Sturdy and self-contained, the Ceasefire Instalert has a highly visible 'stop sign' design to discourage wrongful use and tampering. To add to this, if the fire extinguisher is moved, an integral sounder emits a piercing alarm. This not only dissuades thieves, it also alerts people in case of a fire.

Instalert is easy to install and comes with a deactivation cable so that the

extinguisher can be serviced with ease. It also comes with an operating cable kit and a 9V PP3 alkaline battery.

Instalert has been designed to ensure the extinguisher is totally accessible for emergencies and will not interfere in the event of a real fire.

It can even be installed on an existing fire extinguisher.

FEATURES

⚠️	Highly visible 'stop sign' design is effective in helping stop theft, misuse or vandalism		Compact design (136mm/5.35" dia x 50mm/1.97" deep) mounts easily next to the extinguisher
👂	Sounds a powerful 98dB (at 1 metre) warning alarm when activated (low volume setting also available)	12/24 VDC	Remote powered 12V or 24V DC models
🔋	Self-contained 9V DC alkaline power source		Deactivation cable provided for service
⊗	Indestructible polycarbonate housing		

TECHNICAL SPECIFICATIONS:

Technical Specifications	Drilling Kit (Drilling in metal, wood, gypsum board and plastic)
Housing	3mm/1/8" polycarbonate
Dimensions	136mm/5.35" (height) x 136mm/5.35" (width) x 50mm/1.97" (depth)
Power Source	9V DC alkaline
Sounder Output	95dB - low / 98dB – high (at 1 metre)
Operating Cable	3mm/1/8" galvanised steel
Standby Current	None
Alarm Current	40mA at 95dB / 150mA at 98dB

ACCESSORIES:

- Operating cable kit (includes operating cable and seal)
- Service/deactivation cable
- Tamper key
